Item: Windsor Drive Road Diet Update

Department: Public Works

Over the past two years, Staff has been working with Civiltech Engineering, Inc. to complete the Phase I Engineering Study for the Windsor Drive Road Diet and Resurfacing Project. This project was identified in the Village of Arlington Heights Bicycle and Pedestrian Plan (2017) and aims to improve the pedestrian and bicycle mobility along Windsor Drive which connects important destinations in the Village including nearby Hersey High School, Lake Arlington, and several other surrounding parks.

The project as proposed will include:

- Resurfacing of Windsor Drive from Dryden Avenue/Jane Avenue to south of Hintz Road.
- A new crosswalk with high visibility pavement markings at the west leg of the Windsor Drive and Palatine Road intersection.
- Improved pedestrian pushbuttons and signal heads on all corners of the Palatine Rd Intersection.
- Widening sidewalks north of Palatine Road to 8 feet wide.
- Between Palatine Road and Crabtree Drive, a Road Diet is proposed to modify the 4-lane cross section to provide one lane in each direction, a center landscaped median/left turn lane, and on-street buffered bike lanes.

Village Staff and design consultant Civiltech Engineering, Inc. will provide an overview of the Windsor Drive Road Diet project, summary of public information meeting, summarize the public comments received and update the Village Board on the next steps of the project.
